

THE JINGZHANG DIAGRAM: OVERALL SPATIAL OPERATING SYSTEM

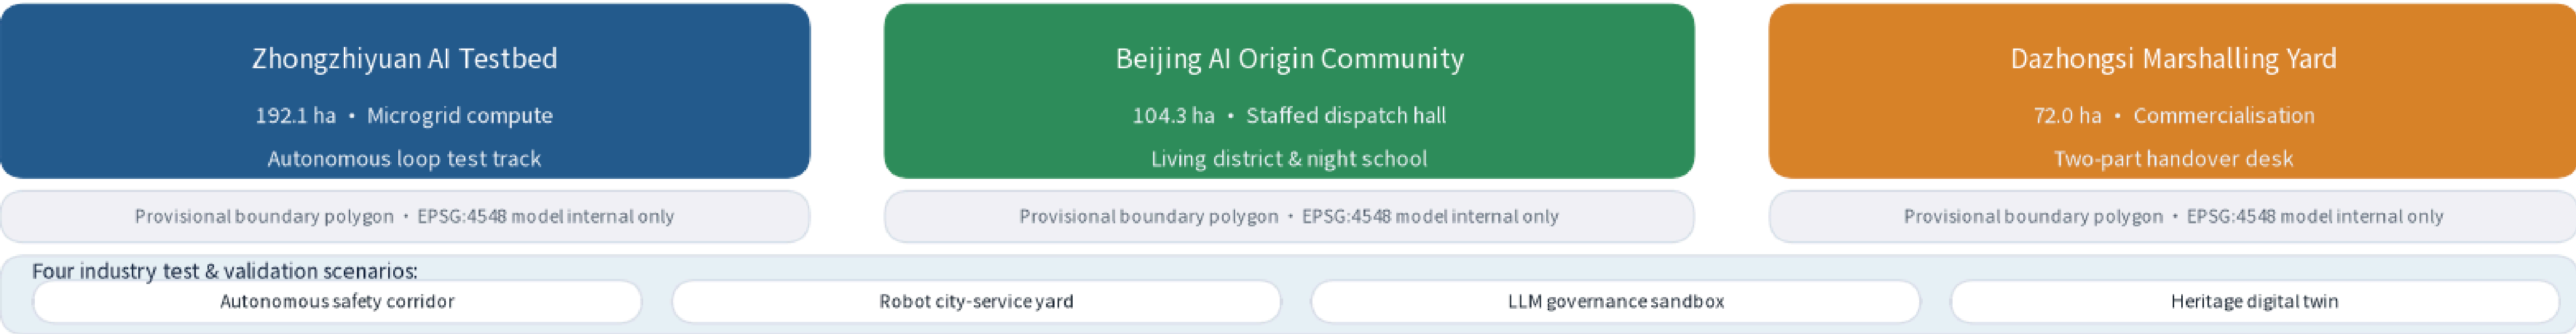

PROVISIONAL BOUNDARY (NON-STATUTORY)

Four Epochs of Innovation along the Corridor & Three Key Areas of the Spatial OS

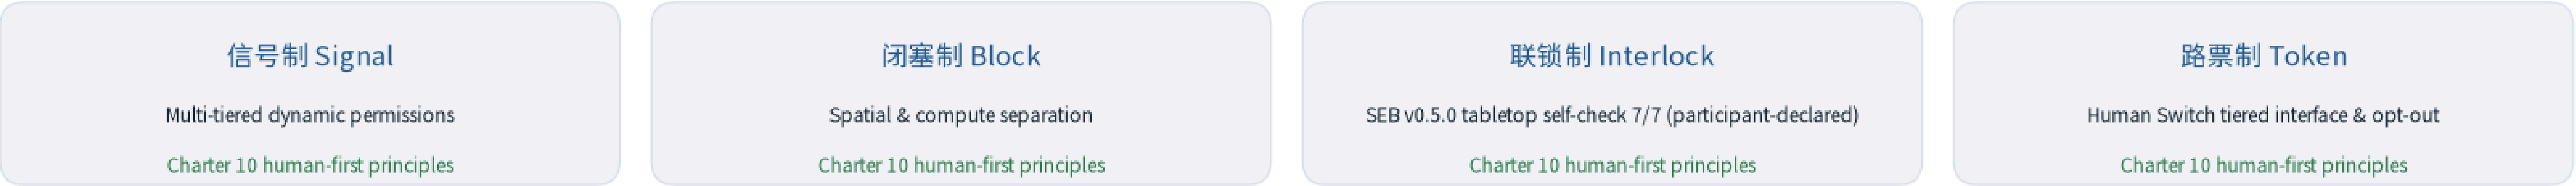

I. FOUR INNOVATION EPOCHS

II. SPATIAL OPERATING SYSTEM - THREE KEY AREAS

III. DIAGRAM GOVERNANCE: 4 HARDWIRED INTERLOCK SYSTEMS

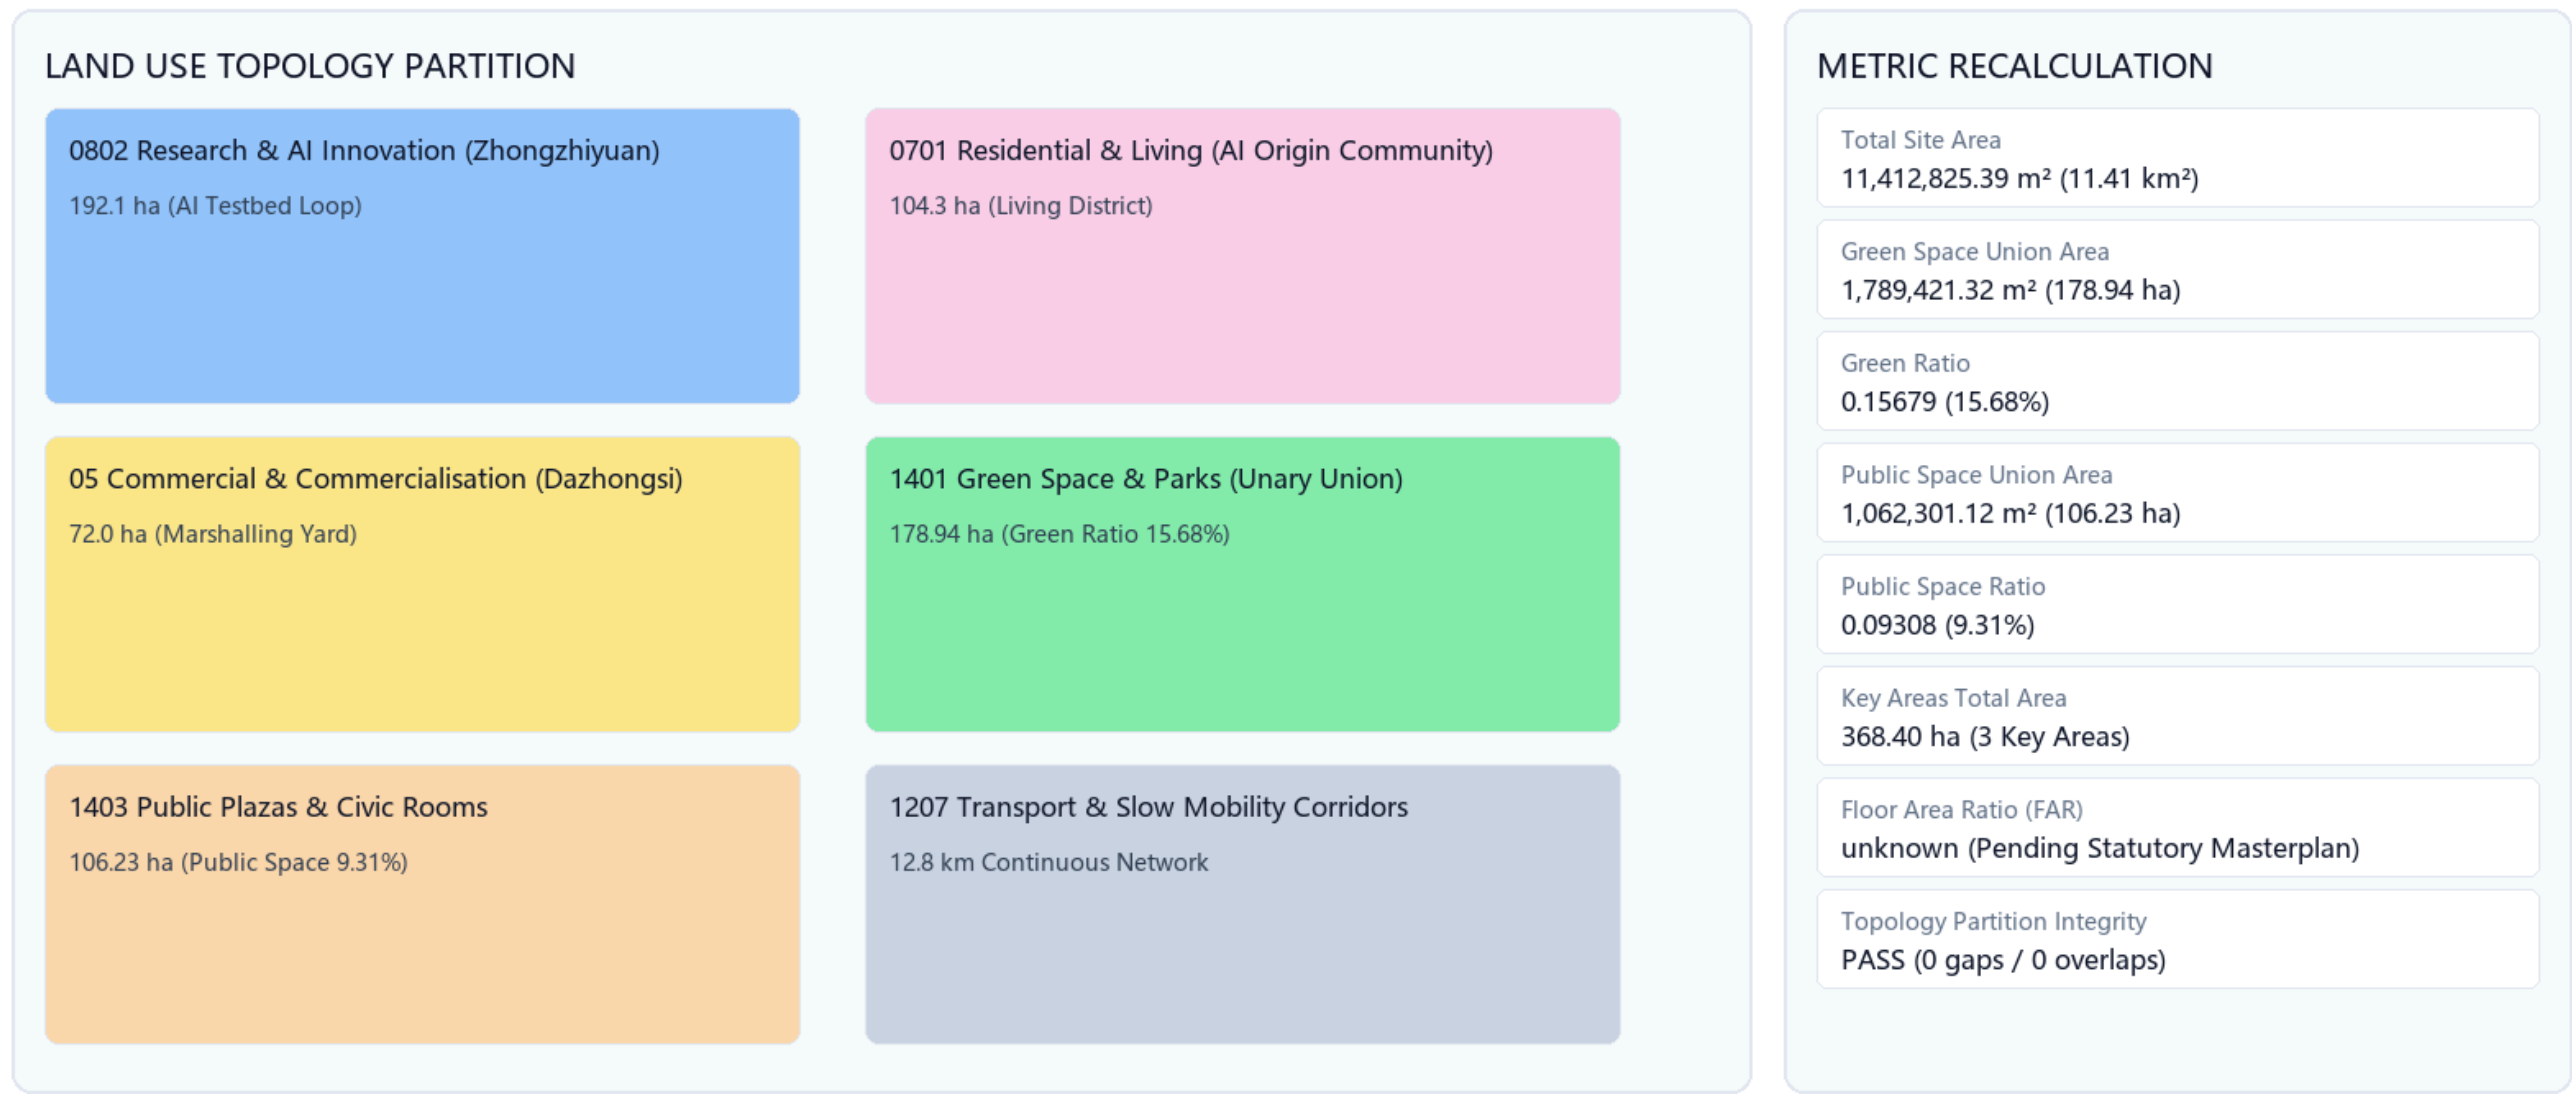

submissions/Juwan-Hwang/jingzhang-diagram • geometry/*.geojson • metrics.json • 图表为过程性研究表达，非法定依据

LAND USE STRUCTURE & ZONING PARTITION (TOPOLOGY SEAMLESS)

11.41 km² Provisional Site Area • Green Ratio 15.68% • Public Space Ratio 9.31%

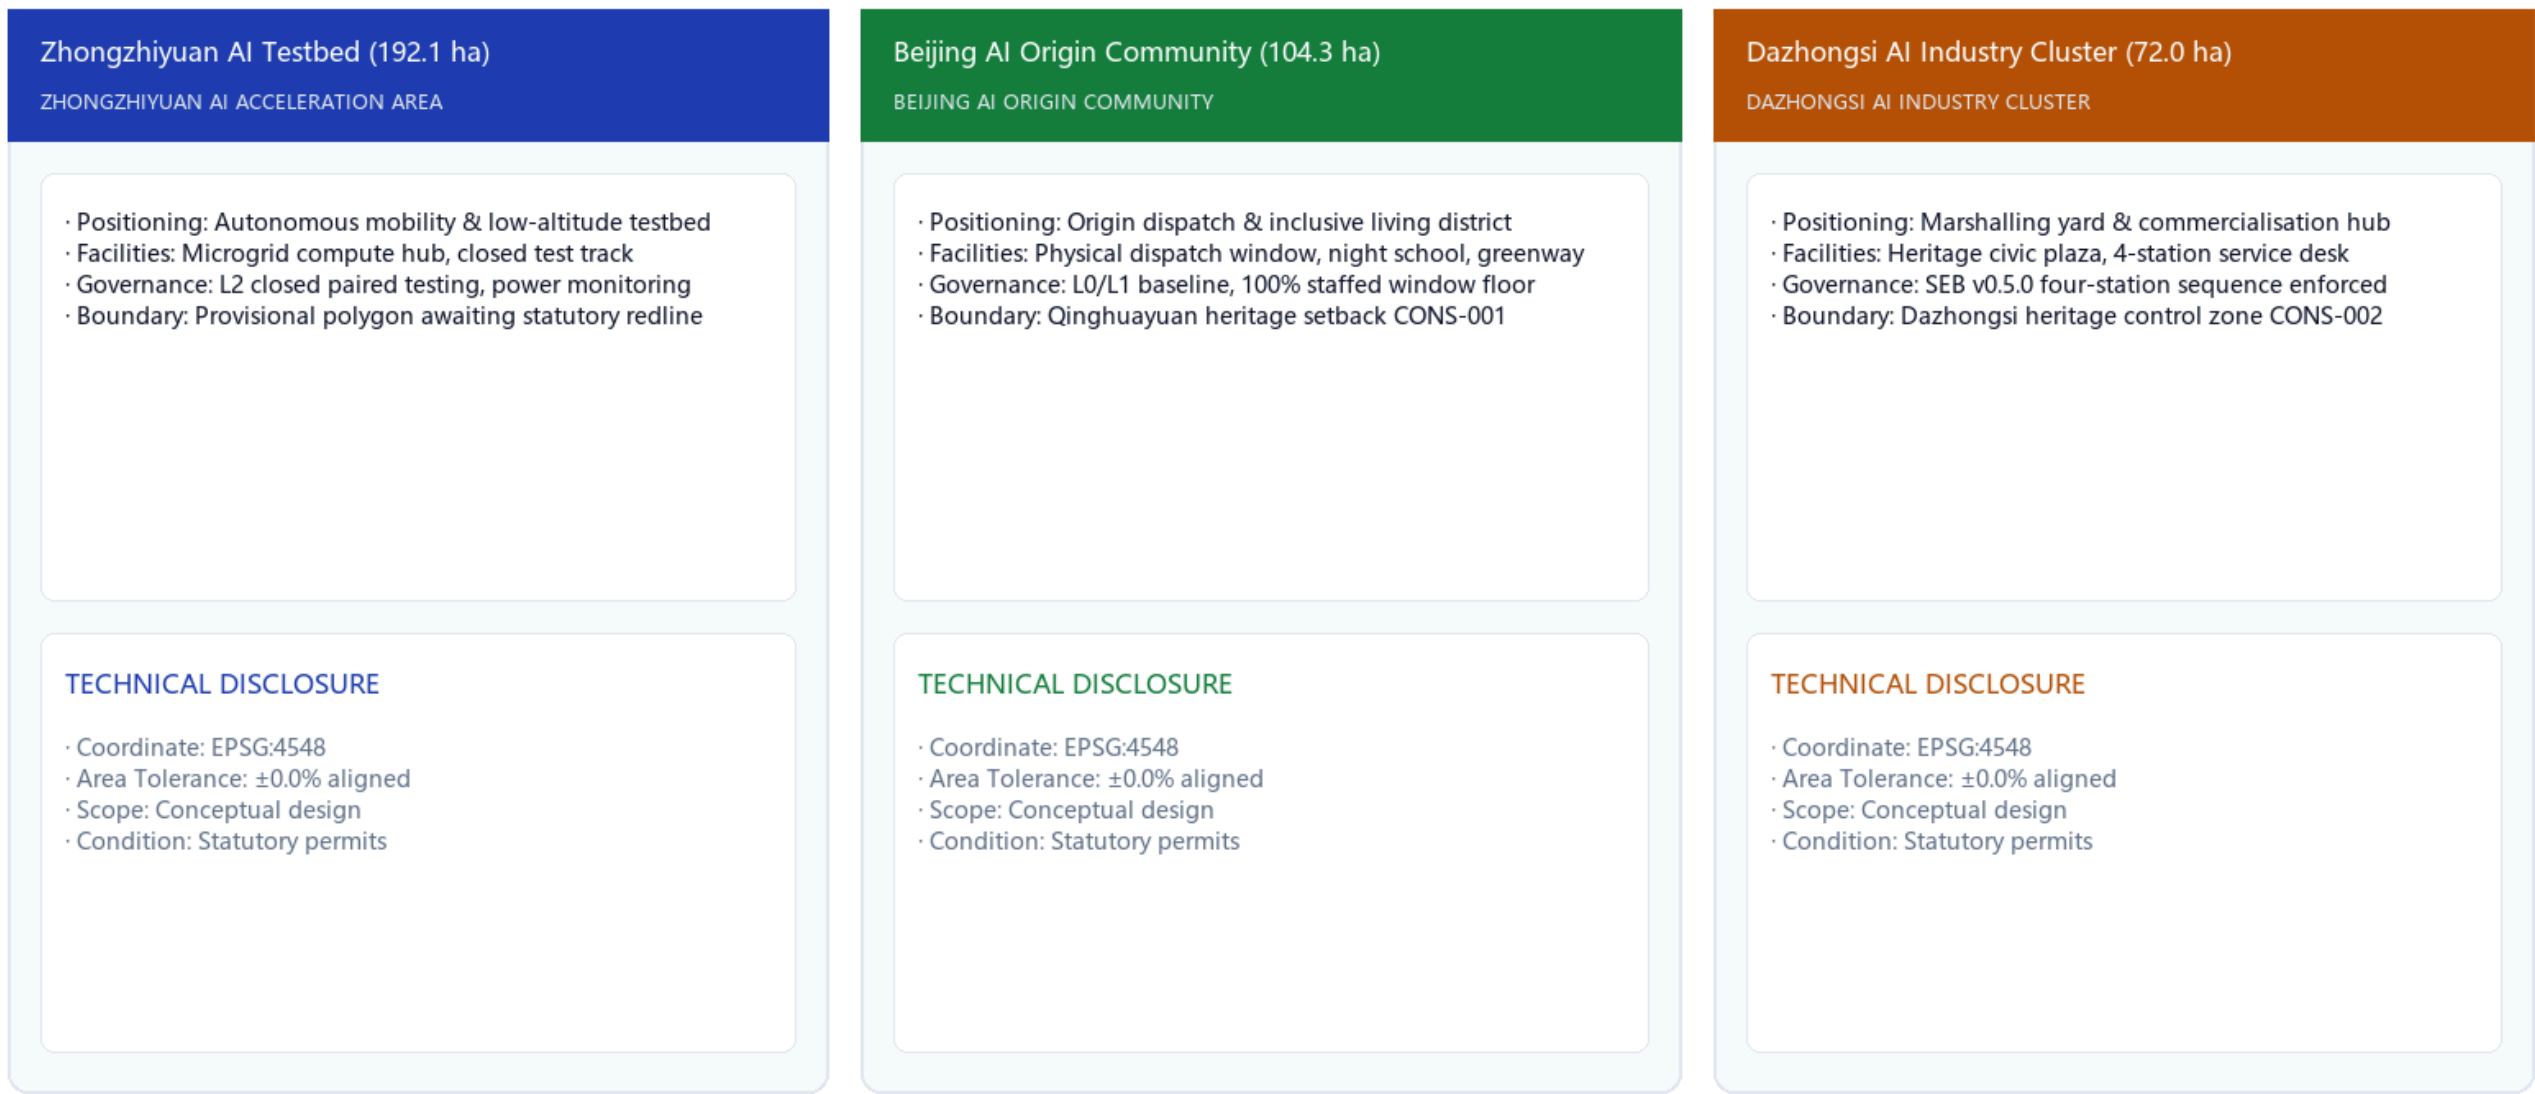

PROVISIONAL GEOMETRY - EPSG4548

THREE KEY DETAILED-DESIGN AREAS (PROVISIONAL BOUNDARIES)

Zhongzhiyuan (192.1 ha) • AI Origin Community (104.3 ha) • Dazhongsì (72.0 ha)

PROVISIONAL GEOMETRY - EPSG4548

Proposal at a glance — The Jingzhang

- Meta-concept: the working diagram (space • time • authority • punctuality)
- Spatial OS: the switchback unit; three districts, two wings, one loop
- Governance: signalling • block • interlocking • token, hardwired
- The Human Switch: public alert -> authorised e-stop -> professional recovery
- Measurement: Innovation Loop Latency (ILL) & diagram punctuality, published
- 12 scenario cards • 4 industry test & validation scenarios • 6 personas

SLOW MOBILITY, TRANSIT & BLUE-GREEN PUBLIC SPACE NETWORK

12.8 km Continuous Greenway • Pedestrian Priority • Barrier-Free Access • The Human Switch (Tiered Safety Interface)

PROVISIONAL GEOMETRY • EPSG:4548

1. MULTI-TIERED MOBILITY NETWORK

Spine Continuous Greenway

12.8 km linear park connecting Beijing North to Tsinghua

AI Micro-Shuttle Test Lane

Speed cap < 15 km/h, dedicated lane, pedestrian priority

Barrier-Free & Silver Walkways

100% tactile paving, gentle slopes, emergency call points

Ring-Road Stitching Bridges

Bridging Ring 2/3/4 barriers for uninterrupted mobility

2. BLUE-GREEN SYSTEM & THE HUMAN SWITCH

Xiaoyuehe Sponge Green Infrastructure

178.94 ha green space, stormwater retention, microclimate

Origin Civic Plazas & Open Space

106.23 ha public space for community life and events

The Human Switch — Tiered Safety Interface

Public alert logged & displayed -> authorised on-site e-stop (3 s hold + two-person confirm) -> professional recovery at dispatch hall; fully audited with accountability chain (conceptual design, no ready-made safety claim)

SEB v0.5.0 Hardwired Self-Check

Two-part handover ledger, staffed windows; 7/7 tabletop fixtures match (participant-declared, synthetic fixtures, no third-party certification)

QUANTITATIVE METRICS, SIMULATION LEDGER & EVIDENCE CROSSWALK

Spatial Recalculation • 10 Synthetic Tasks (90% Success) • SEB v0.5.0 Tabletop Self-Check (7/7 Match) • 7-Dimension Rubric

PROVISIONAL GEOMETRY • EPSG:4548

1. SPATIAL & SIMULATION METRICS

Metric Key	Declared Value	Provenance / Formula
Total Site Area (site_area_sqm)	11,412,825.39 m²	EPSG:4548 provisional boundary
Green Space Area (green_space_area_sqm)	1,789,421.32 m²	unary_union intersection
Green Ratio (green_ratio)	0.15679 (15.68%)	Exact ratio (topology-consistent)
Public Space Area (public_space_area_sqm)	1,062,301.12 m²	unary_union intersection
Public Space Ratio (public_space_ratio)	0.09308 (9.31%)	Exact ratio (topology-consistent)
Simulation Task Count	10 tasks (SIM-001–010)	Deterministic seed: 20260831
Simulation Success Rate	0.90 (90.0%)	Honest disclosure of overrun
SEB Tabletop Self-Check	7 / 7 fixtures match (Exit 0)	Participant-declared • synthetic fixtures • no third-party certification

指标与 simulation.json / metrics.json 机器可读值一致；SEB 推演为参与者桌面自检，可离线复跑，未经第三方认证

2. RUBRIC CROSSWALK & DATA GAP DISCLOSURE

Brief Alignment (20%)

3-level scopes • 6 required tasks • 3 key areas • 12.8 km corridor

Originality (10%)

Working Diagram concept • Switchback unit • 4 innovation epochs

AI Innovation (15%)

4-system interlock • 12 scenario cards • SEB v0.5.0 self-check 7/7

Feasibility (20%)

JZ-01–10 lifecycle ledger • Adopter rights • 4-phase rollout

Public Interest (10%)

100% staffed window floor • Barrier-free • The Human Switch (tiered)

Risk Compliance (10%)

Provisional boundaries • Heritage setbacks • Adverse readings

Completeness (15%)

Bilingual parity • Embedded fonts • A3/A0 drawings • 4 Gate PASS

Statutory Notice: Official redlines & FAR are unknown; conceptual design does not replace statutory permits.

Proposal at a glance — The Jingzhang Diagram

- Meta-concept: the working diagram (space • time • authority • punctuality)
- Spatial OS: the switchback unit; three districts, two wings, one loop
- Governance: signalling • block • interlocking • token, hardwired
- The Human Switch: public alert -> authorised e-stop -> professional recovery
- Measurement: Innovation Loop Latency (ILL) & diagram punctuality, published
- 12 scenario cards • 4 industry test & validation scenarios • 6 personas

Implementation ledger & governance discipline (JZ-01)

- Phases: track-laying -> commissioning -> acceleration -> networking (0-10 yrs)
- Every project lists dependencies, proposed operator, and exit protocol
- Four hardwired constraints: no token, no run • no equivalent, no replace
- no exit, no deployment • no audit, no scaling
- Accountability rests on natural persons; rejections are ticketed and published
- Simulation ledger is offline synthetic rehearsal (fixed seed), not field evidence
